For Immediate Release

To protect the safety of our residents, and during this time of heightened awareness based upon the rapid and deadly spread of the Coronavirus through elderly populations, Wesley Commons is following recommended protocol by dramatically limiting visitors based upon medical necessity in both of its healthcare facilities at this time. We are still serving the Greenwood community, and actively taking admissions, while following the same heightened protocols as are many other post-acute providers in the local, state and national markets that serve people age 65 and older.

As for Neighborhood Living at Wesley Commons, we are strongly discouraging visits at this time, simply out of an abundance of caution in an attempt to avoid compromising the safety of any of our residents. For more information please see updates on our website at www.wesleycommons.org or send us an email to info@wesleycommons.org or you may contact our Public Information officer directly at 864-227-7397.
